BugBlock

ANTI-BED BUG treatment

 **STELLINI**
Italian Style In Ticking Since 1947

An effective treatment for a bite-free sleep.

Bed bugs likely get their name from their habit of feeding on human blood, usually when these are asleep. They can cause annoying allergic reactions such as itching, blisters or hives.

Bed Bugs typically hide in mattresses, box springs, bed frames and headboards where they have easy access to people. But they also like to travel and will hide in suitcases, boxes and shoes to be near a food supply. Consequently, the risk of encountering bedbugs increases in places with high turnovers of guests – such as hotels, hospitals or homeless shelters. And so - indirectly - they can also contribute to economic inconvenience.

However, because bedbugs live solely on blood, having them in your inner rooms is not a sign of dirtiness. You are as likely to find them in immaculate homes and hotel rooms as in filthy ones. That is why an effective and preventive treatment is more than recommended.

BUGBLOCK FABRICS:

A tested and qualified solution

At STELLINI we really believe that a good night's sleep should remain undisturbed: this is why over time we've created special mattress fabrics that are meant to get rid of annoying bedbugs and create a safe and comfy place to sleep.

These fabrics come with a treatment applied to the fabric that works as a natural deterrent: these barriers create an inhospitable environment, making it harder for bedbugs to settle.

BugBlock Features

- 100% efficacy repelling bedbugs
- Bio-based solution
- Accepted and dermatologically tested

 **Certified Effectiveness**

OEKO-TEX® Standard 100 Certified

Compliant with Reach and BPR obligations

BUGBLOCK in a nutshell

Plant-based origin

Free from chemical
fixing agent

Non-neurotoxic
to humans
