Senses Skin

Rehydrate. Regenerate. Rejuvenate.

STELLINI
Italian Style in Ticking since 1947

NIGHT TIME.

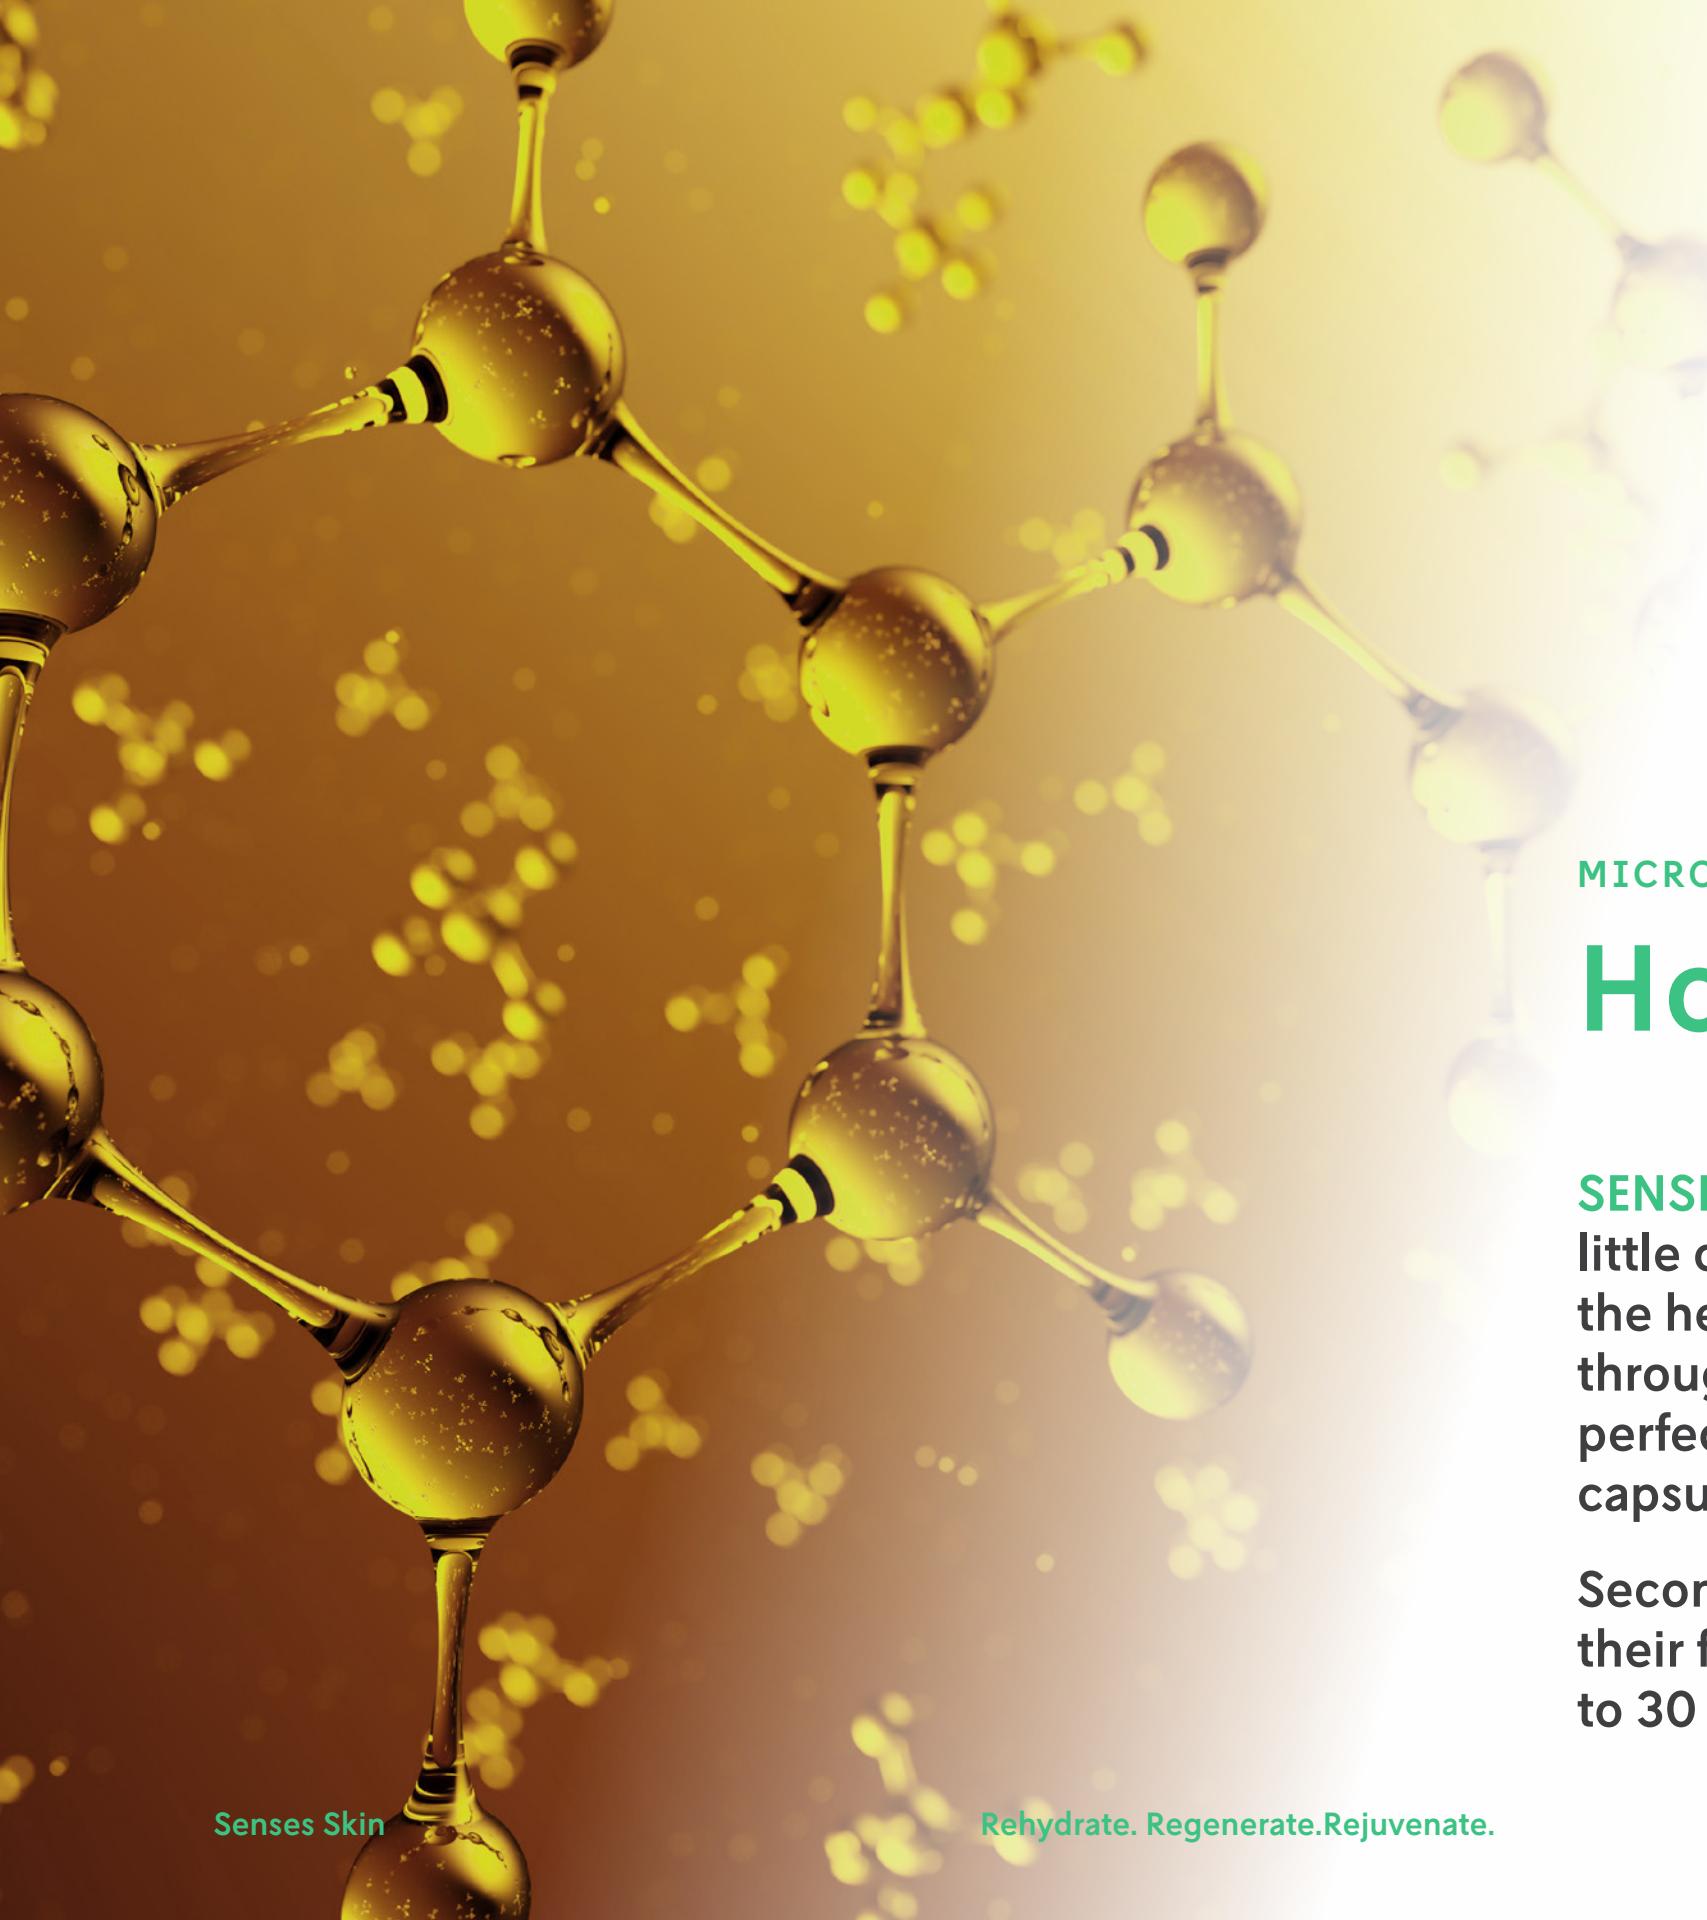

Time to take care of skin care.

Moisturising creams take time to get absorbed and don't go well with tight clothes. They make your hands greasy. Leave stains on fabrics. And while we might be lacking time in the morning, we might be just too tired in the evening to take care. Does that sound familiar?

Lucky enough, taking care of your skin is no longer a matter of applying creams and lotions. **SENSES SKIN** uses cutting-edge textile technology that combines textile with active cosmetic substances. Simply said: your mattress transforms into a virtual beauty center, eliminating the need to actively apply the cosmetic substance!

The result is that Senses Skin will allow your customers to look after their skin when it's most needed and with zero effort: *night in, night out* and without having to think about it...

BENEFITS & ATTRIBUTES

- Long lasting
- Effortless & time saving
- Does not impair the handle
- Applicable on all kind of textile fibers

MICRO-ENCAPSULATION TECHNOLOGY

How (Long) Does It Work?

SENSES SKIN is based on micro-encapsulation technology: tiny little capsules are soaked with the active ingredients and then fixed in the heart of the fabric. These capsules are waterproof and only burst through friction with the body and the mattress, meaning they're perfect to release nourishing creams to the body of the user. The capsules are highly durable, as without any friction, nothing happens.

Second, as not all capsules burst at once, threaded textiles keep their function even longer. This makes Senses Skin last up to 30 washes!

MOTHER NATURE'S BEST

KEY INGREDIENTS

SENSES SKIN is built around the famous Co-enzym Q10 and has enhanced skin-care properties, thanks to the addition of Aloe Vera extract and Sweet Almond Oil: both natural components with proven effectiveness.

ALOE VERA

Referred to as *the plant of immortality*, Aloe Vera is known for keeping the skin clear and hydrated. It restores the natural balance of body and skin as a moisturizer and a pain soother. Aloe vera's well known soothing properties, antioxidant content, and obvious hydration benefits make it thus a no-brainer addition in many skincare and cosmetics' products.

CO-ENZYME Q10

The co a is a powerful antioxidant which may help improve the signs of skin aging. It is known for stimulating skin cell renewal, generating and repairing the skin. At cellular level it revitalises the skin, leaving you feeling more energised.

SWEET ALMOND OIL

Known in ancient Rome to treat injuries, Sweet Almond Oil improves the spreadability of cosmetic products, enhancing the skin, leaving it smooth and soft. Sweet Almond Oil has moisturising, nourishing and soothing properties and is particularly adapted to sensitive skins.
